Education

GAZIANTEP UNIVERSITY

Gaziantep, TURKIYE

Bachelor of Mechanical Engineering (%100 English), GPA: 2.92/4.00

Graduation Date: 06/2024

- Ranked 2nd in class.

Experience

Kuartis

Ankara, TURKIYE

Autonomous Driving Field Application Engineer

09/2024 –

- Conducting tests for autonomous vehicles on land and sea, specializing in general autonomous driving, control, ADAS, mapping, and localization.
- Proficient in sensor calibration and data collection for calibration purposes, including cameras, LiDAR, GNSS, and other critical sensors.
- Expertise in integrating and testing sensor data for real-time performance, fault detection, and debugging using ROS2 and C++.
- Integrating tested code with GitLab and managing branches effectively.
- Strong knowledge of defense industry vehicle systems, including sensor integration, CAN bus, and vehicle network protocols.

Baykar Technologies

Istanbul, TURKIYE

Long Term Intern

02/2024 – 05/2024

- Developed an autonomous fixed-wing aircraft simulation to support guidance and control algorithm analysis.
- Evaluated and improved fixed-wing guidance methods to achieve more accurate flight paths.
- Modeled and implemented the flare phase behavior of fixed-wing aircraft in simulation environments.

Middle East Technical University, ROMER

Ankara, TURKIYE

Summer Intern

07/2023 – 08/2023

- Collaborated on the ChessMate project using the Franka Emika Panda 7 DOF robotic manipulator.
- Developed and implemented algorithms for precise robotic motion planning and control.
- Utilized computer vision techniques to improve object recognition and manipulation.

Automobile Robot and Energy Community (ORET)

Gaziantep, TURKIYE

Team Member

10/2021 - 05/2023

- Created YOLO model for traffic sign detection using a custom dataset for autonomous vehicles.
- Develop and research autonomous vehicle systems to perform tasks such as perception, localization and mapping, planning and control, and sensor fusion using ROS and Autoware open-source autonomous driving packages.

Skills & Interests

Technical: Python, C++, ROS (Robot Operating System), Docker, Git, Gazebo, System Dynamics & Control, Machine Learning, SOLIDWORKS, AutoCAD, Adobe Photoshop.

Language: Native in Turkish and Limited working proficiency in English.

Laboratory: I took Mechanical Engineering Laboratory (ME316) course, which is including techniques of measurement of heating value, temperature, force, speed, power, pressure and flow and statistical, graphical and mathematical data analysis.

Interests: Camping, Travel, Computer Games, Football (Certified football player in 2011-2013).
