Education

GAZIANTEP UNIVERSITY

Master of Science in Mechanical Engineering

Gaziantep, TURKIYE

02/2026 - Present

- **Specialization:** Machine Theory and Dynamics
- **Key Topics:** Robotics, Mechatronic Systems, Mechanism Kinematics

Bachelor of Mechanical Engineering (%100 English)

09/2019 – 06/2024

- GPA: 2.92/4.00

Experience

Kuartis

Autonomous Driving Field Application Engineer

CVMLR (Computer Vision, Machine Learning, Robotics)

Ankara, TURKIYE

09/2024 – Present

- Conducting development, simulation, and field tests for autonomous vehicles on land and sea.
- Proficient in sensor calibration and data collection for calibration purposes, including cameras, LiDAR, GNSS, and other critical sensors.
- Expertise in integrating and testing sensor data for real-time performance, fault detection, and debugging using ROS2 and C++.

Baykar Technologies

Long Term Intern

Istanbul, TURKIYE

02/2024 – 05/2024

- Developed an autonomous fixed-wing aircraft simulation to support guidance and control algorithm analysis.
- Evaluated and improved fixed-wing guidance methods to achieve more accurate flight paths.
- Modeled and implemented the flare phase behavior of fixed-wing aircraft in simulation environments.

Middle East Technical University, ROMER

Summer Intern

Ankara, TURKIYE

07/2023 – 08/2023

- Collaborated on the ChessMate project using the Franka Emika Panda 7 DOF robotic manipulator.
- Developed and implemented algorithms for precise robotic motion planning and control.
- Utilized computer vision techniques to improve object recognition and manipulation.

Automobile Robot and Energy Community (ORET)

Team Member

Gaziantep, TURKIYE

10/2021 - 05/2023

- Develop and research autonomous vehicle systems to perform tasks such as perception, localization and mapping, planning and control, and sensor fusion using ROS and Autoware open-source autonomous driving packages.
- Developed a YOLO-based perception model for traffic sign detection using custom datasets.

Skills & Interests

Technical: Python, C++, ROS (Robot Operating System), Docker, Git, Calibration, Simulation, System Dynamics & Control, Machine Learning, Linux, SOLIDWORKS, AutoCAD

Language: Native in Turkish and Limited working proficiency in English.

Interests: Camping, Travel, Computer Games, Football (Certified football player in 2011-2013)
